

McKeown Elementary Stormwater Summer Camp 2018

Day 1: Preventing Water Pollution

IMAGINE
Think of an idea
Draw a picture of it
Write a plan for it

PLAN
List the steps
Decide what you need
Set a deadline

CREATE
Follow your plan
Use your materials
Be creative

IMPROVE
Check your work
Ask for feedback
Make changes

ASK
Ask questions
Listen to answers
Learn from others

COMMUNICATE
Share your ideas
Work with others
Present your work

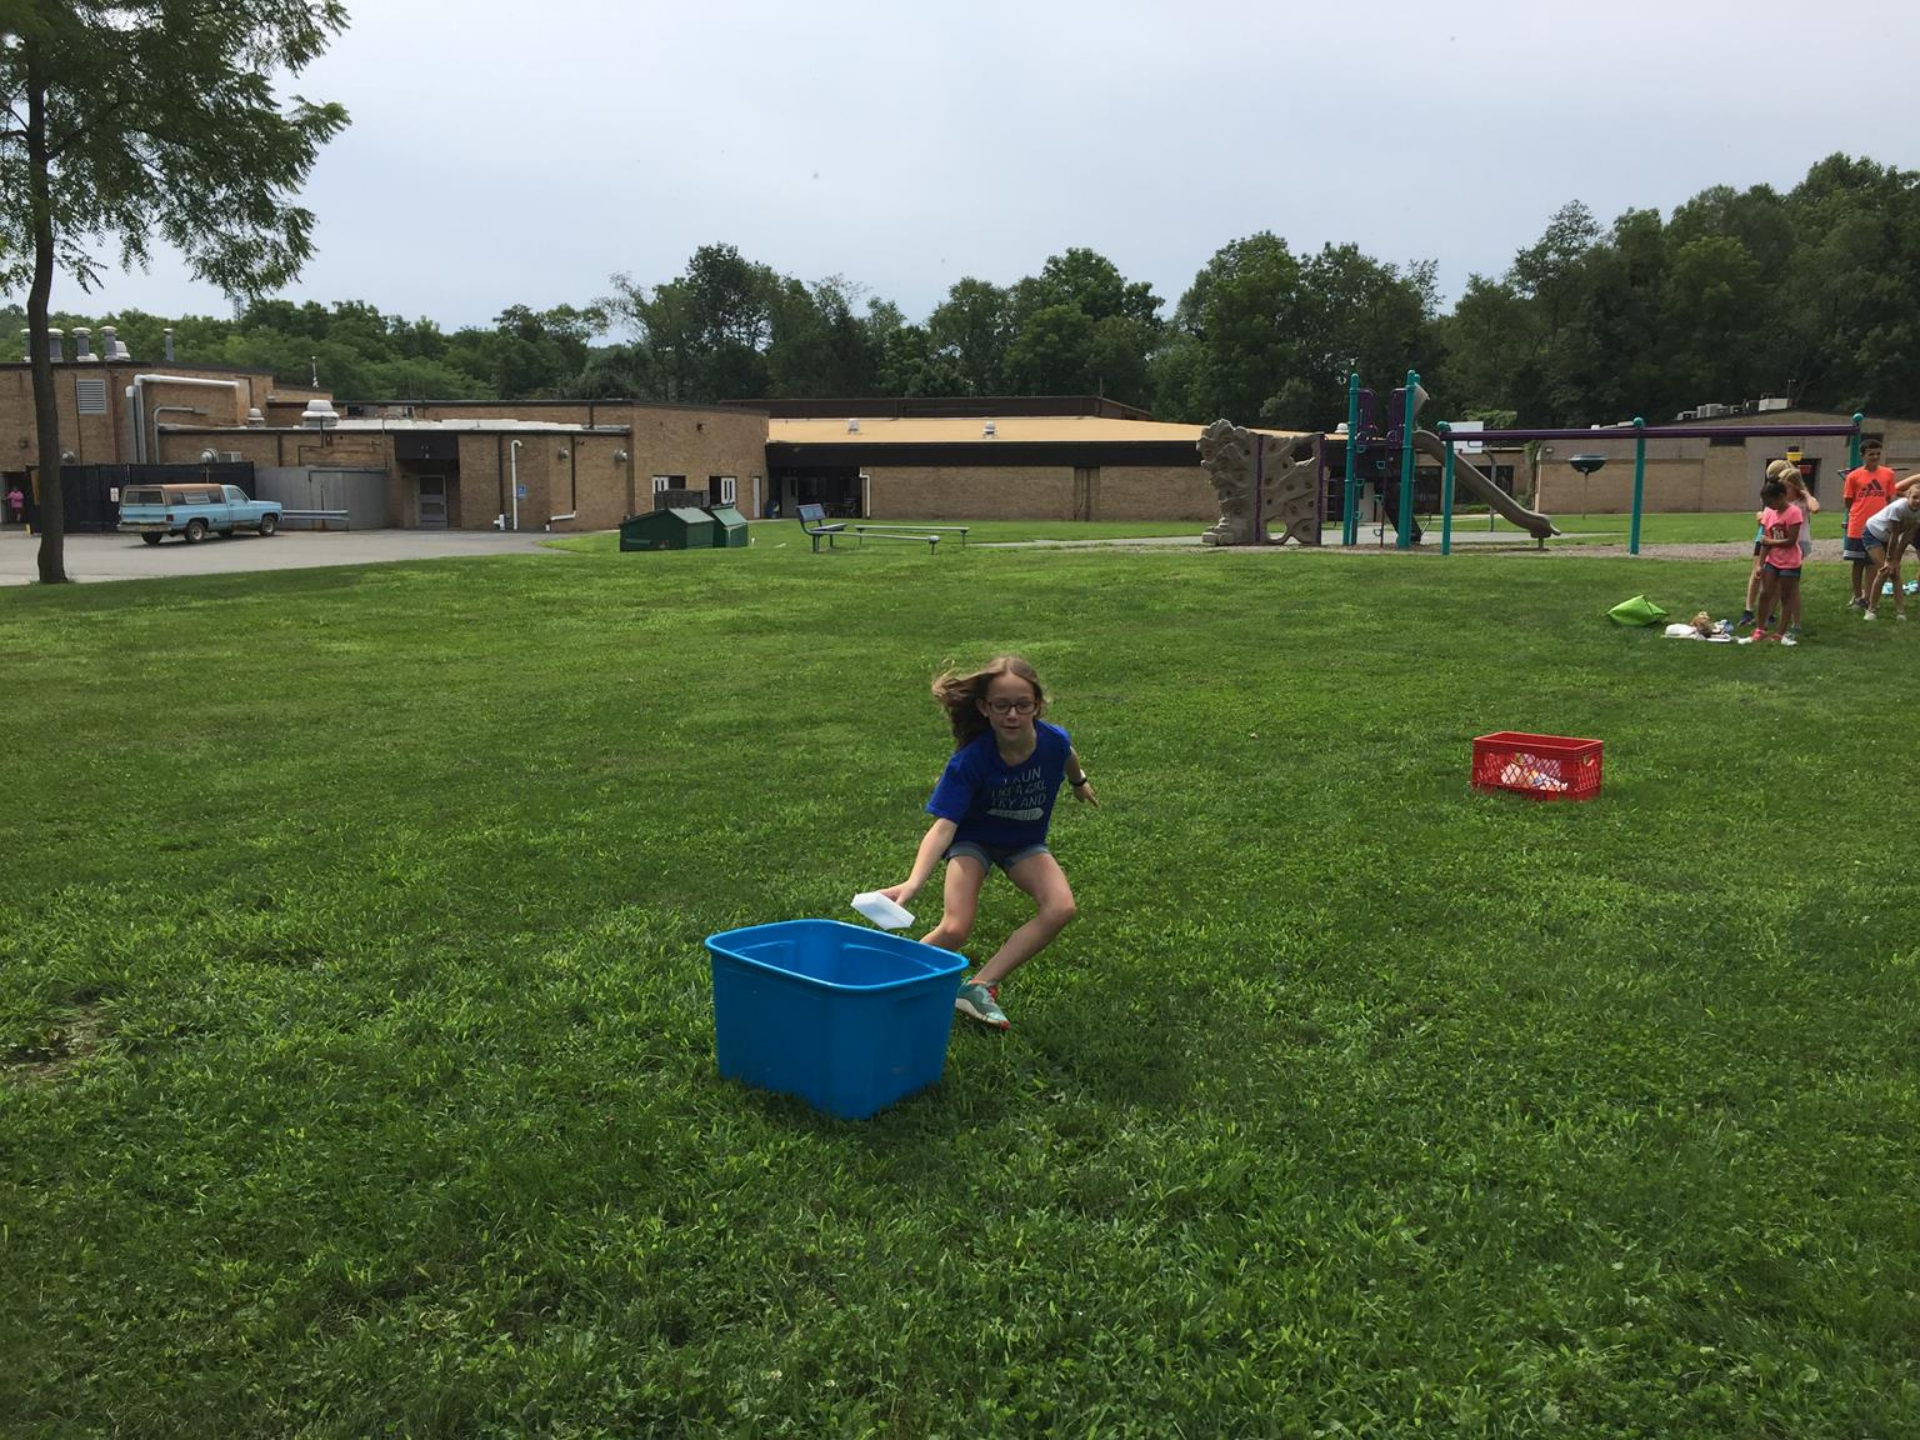

LET'S
DO
THIS.

TRASH

WAKEOWN SCHOOL

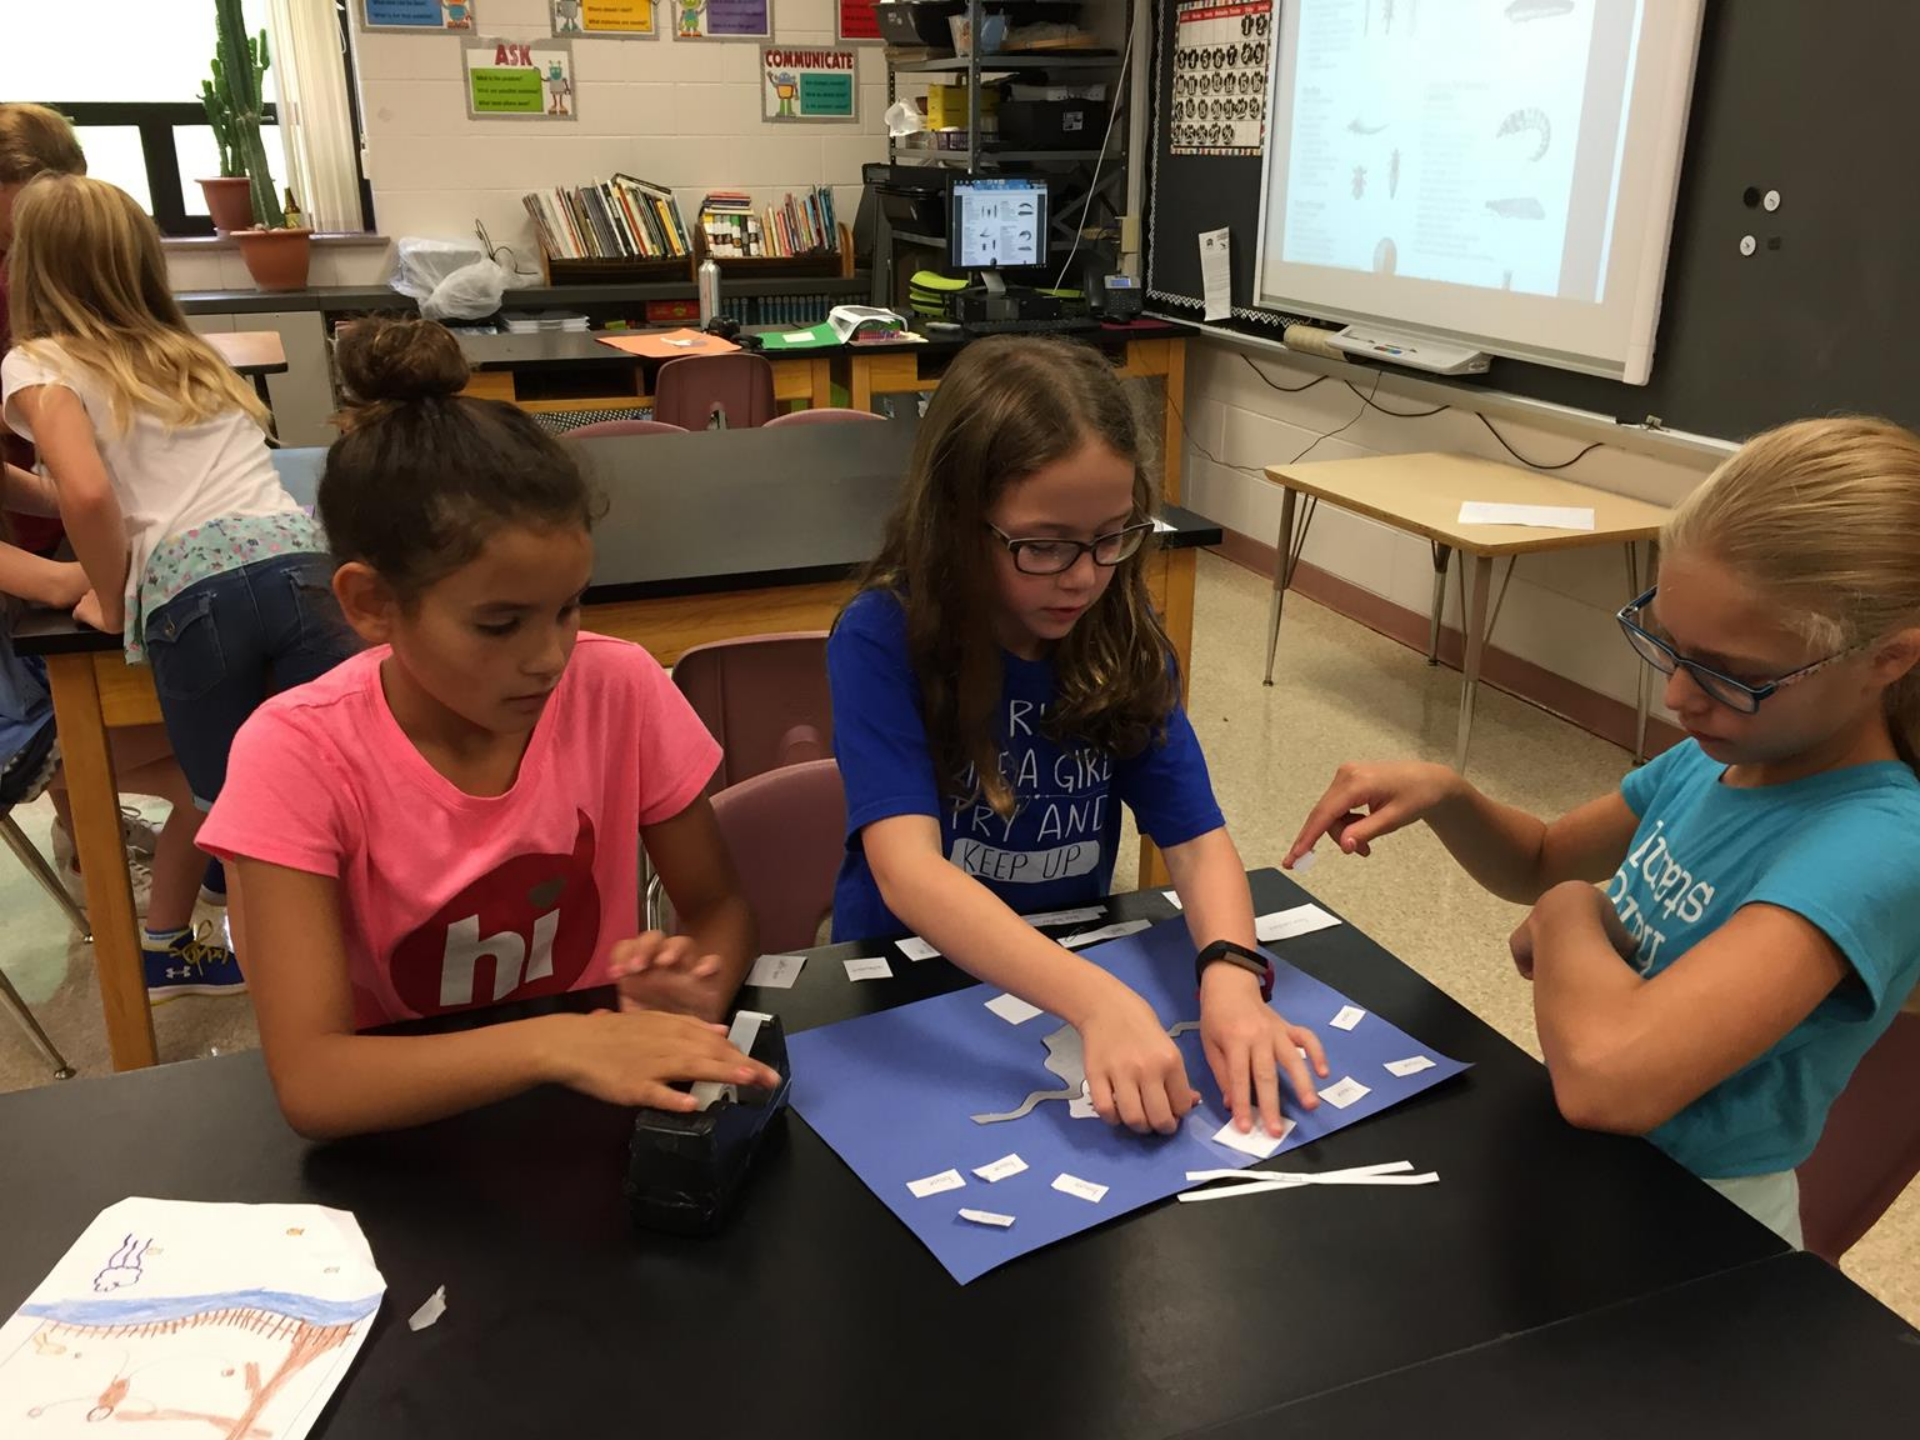

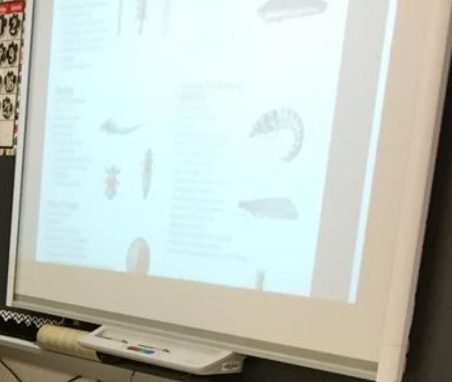

ASK
What do you want to know?
What do you need to know?
What do you already know?

COMMUNICATE
Share your ideas.
Listen to others.

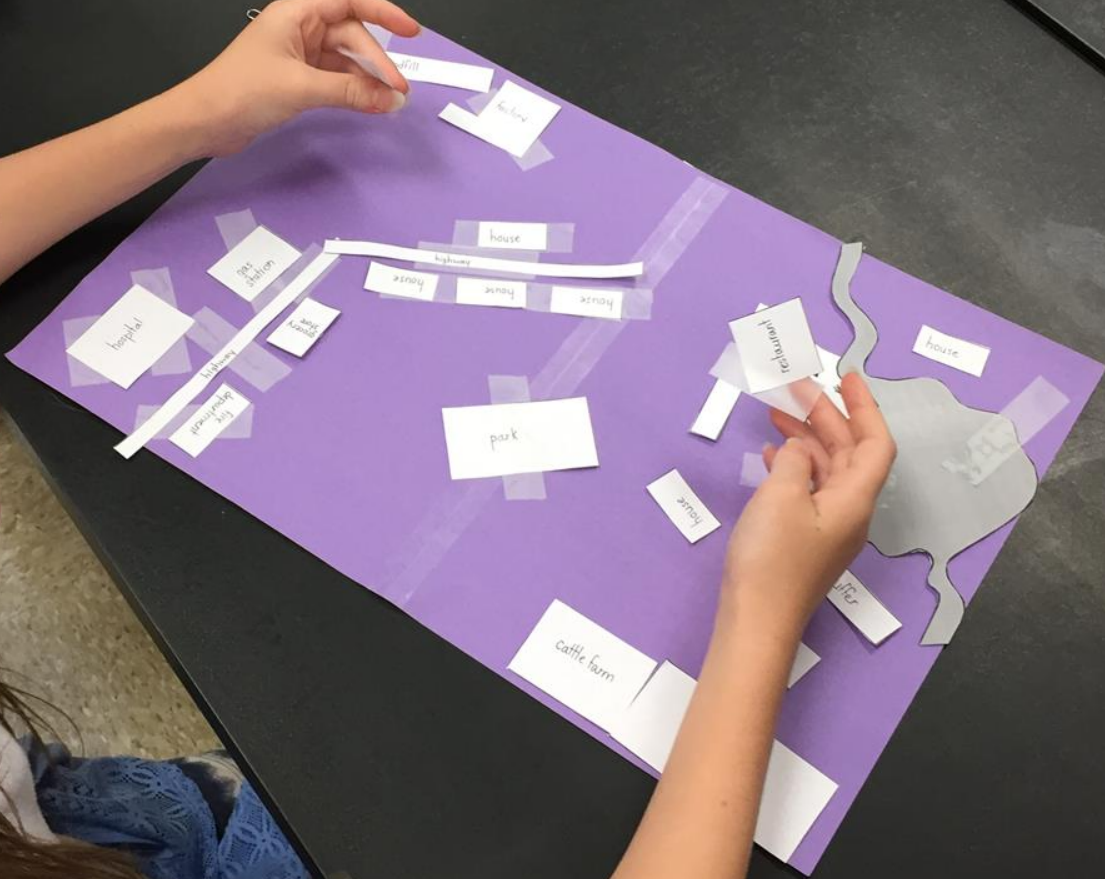

REMEMBER

Day 2: Water Conservation

MCKEOWN RAIN GARDEN
Restoring for life

The sign contains several sections with illustrations and text, including:

- WATER**: Illustrations of water droplets and a diagram of water flow.
- PLANTS**: Illustrations of various plants and trees.
- INSECTS**: Illustrations of bees, butterflies, and other insects.
- BIRDS**: Illustrations of various birds.

Logos for the University of Wisconsin-Madison and other organizations are visible at the bottom of the sign.

Hooked on Fishing

Not on Drugs

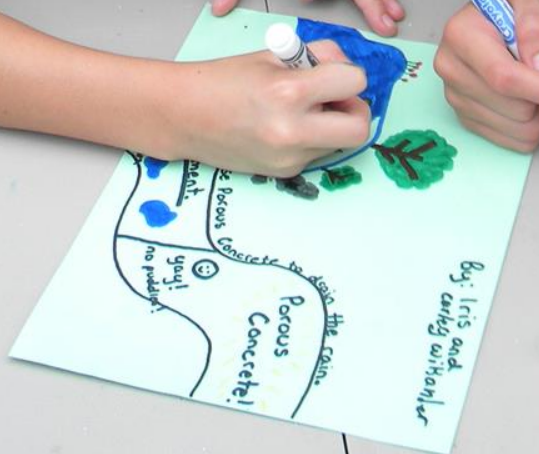

njfishandwildlife.com

Rain Garden

Benefits

Absorbs
water

Provides
Habitat

Rain Gardens and other environmental projects

Benefits:

- Flowers
- Plants
- Birds
- Animals
- Water
- Environment
- Insects
- Habitats

Rain garden collect water that would otherwise go to the river and gives it to plants.

Rain gardens protect and give habitats to many animals.

Rain Garden

Pros

- Helps the watershed
- Gives animals a habitat
- Water goes in rain garden instead of picking up litter and going into a river

"Use your Brain,

Help the water Drain."

As you can see there are many good things

Rain gardens do and help the environment one problem would be the cost.

Cons

- \$\$\$
- If your allergic to bees many plants can cause bees to come

Day 5: Rutgers Best Management Practices Tour

Rain Garden
- Water Quality and Habitat Enhancement Project

This garden is designed to intercept, treat, and infiltrate stormwater at the source, before it becomes runoff. The plants are native to the region and help retain contaminants that could otherwise harm nearby waterways. Rain gardens are beautiful, low-maintenance, and inexpensive gardens that you can install at home.
