

NEW JERSEY FUNDING NAVIGATOR

A program of New Jersey Future

New Jersey Future's Funding Navigator Program is New Jersey's first statewide nonprofit program committed to helping our state's most in need localities access water infrastructure funding. This program will build a bridge to meet the needs of communities, their municipalities, and small to mid sized water systems in accessing funding.

The Funding Navigator Program seeks to advise and review funding applications, assist in hosting community outreach and provide consultation through the funding process from start of application to submission. We specialize in being an on-the-ground partner. Our team understands that it will be our role to match water systems' needs with the technical expertise our partners can provide to municipalities.

MUNICIPAL SOLUTIONS

We recognize that effective technical assistance should not just be about solving immediate problems but also about fostering long-term, sustainable solutions. By integrating environmentally responsible practices, economic vitality, and social equity into our solutions, the Funding Navigator Program seeks to assist municipalities to not only resolve their immediate water infrastructure issues but also build a resilient and thriving future for their communities.

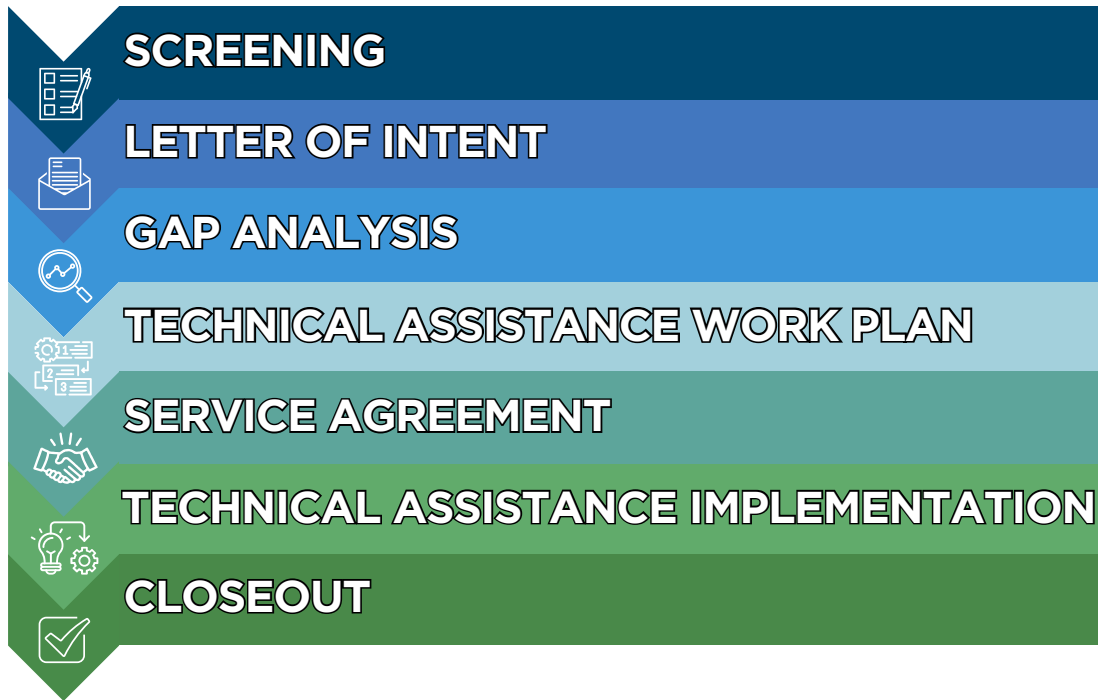

NJF's Funding Navigator team is ready to assist small to medium sized water systems serving overburdened communities. Our ability to provide a one-stop shop for technical assistance simplifies the process for municipalities, making it easier for them to access the resources and expertise they require.

FUNDING SOURCES AND TIMELINE

We pursue funding opportunities for communities and water systems in the forms of loans and grants through both federal and state agencies. This can include the New Jersey Water Bank and other emerging programs. Accessing funds typically takes 12 to 16 months.

HOW WILL WE ACCESS FUNDING?

NEW JERSEY FUTURE SUCCESS

New Jersey Future boasts an impressive track record of success and a deep understanding of the unique challenges that municipalities face in New Jersey. Since 1987, New Jersey Future has been working alongside local governments, and has honed our expertise to address the intricate issues that arise. By leveraging past relationships we can provide exemplary support for your organization.

PARTNERS

The Funding Navigator Program partners with several national and regional organizations and agencies including EPIC, NJDEP, Syracuse, and Moonshot Missions to provide technical assistance.
